

Dispatch Checking Made Easy

Dispatch Checking ensures customer orders are picked correctly according to the Tax Invoice. At the dispatch point, each consignment is scanned against the physical tax invoice thus ensuring that the paperwork and goods match.

Features

Confirmation tags are printed for approved orders

Invoice Tagging notifies the accounts department of approved orders

Variances between picked vs ordered stock are highlighted per invoice

Orders with variances are blocked until the customer's order is picked correctly

Benefits

- Ensure accuracy, goods ordered are dispatched as per the tax invoice
- User friendly and seamless solution
- Reduces costs incurred as a result of sending the customer the wrong products
- Reduces human error
- Reduces the risk of theft and loss of stock
