

## FenyaEDI: Sage Pastel EDI Integration.

**FenyaEDI** is a fully integrated system for processing of orders/invoices and credits between suppliers and customers and supports:

- Pick n Pay
- Shoprite
- Smollan
- Scarecrow
- Honeybee
- Imperial

What this means is that any Purchase Order placed by the customer (Pick n Pay) will be automatically posted to Pastel. Once the order has been picked and processed, the invoice details will be automatically updated on the Pick n Pay system. There is no human intervention, double capturing, errors and the like.

The system works in the following way:

- Pick n Pay/Shoprite are polled for orders periodically (Smollan/Honeybee/Scarecrow orders are pushed to FenyaEDI portal).
  - When an order is detected, it is downloaded and decoded.
  - The decoded order is posted to Pastel and an email notification is sent to the designated user.
- The order is picked and processed in the normal way.
- When the order becomes an invoice, these details are sent to Pick n Pay. This improves the efficiency of the delivery process at the depot.
- At month end, statement details are extracted from Pastel and formatted as required and presented in an excel type grid which can then be uploaded to the web portal.
- The exception to the above is Imperial.
  - The Imperial Proteus system invoices the orders delivered.
  - Once invoiced, the invoice data is pushed to the FenyaEDI portal.

- The invoice/credit data is decoded and posted to Pastel.

## **Key Features**

FenyaEDI provides you with the following key features designed to ensure the quality of data been posted to Pastel

- Vendor Mapping
  - The mapping system ensures that each order is posted to the correct Pastel customer account and warehouse/store
- Delivery Dates
  - If utilised this ensures that orders placed are within predefined delivery dates
- Post to Pastel as a Sales Order or Invoice
- eMail/FTP picking data to 3<sup>rd</sup> Party distributors
- Support for multiple Pastel companies
- Validate prices/use Pastel pricing and/or deals
- Use the product code or barcode on the order to identify the Pastel item
- Multiple delivery address options are available
- Use Pastel or order descriptions
- Check for leading zero's on the incoming product code.
