

Online product catalogue and ordering system for Sage Pastel

FenyaSoft provide an online system designed for you to showcase your products to your customers.

The Online Ordering system consists of a

- **WEB interface for customers to view your products**
 - **Filter to browse product by category or store/warehouse**
 - Information displayed is the item code, description, image
 - customer specific pricing(optional)
 - **Catalogues can be downloaded in pdf form and/or emailed to the customer**
- **WEB interface for customers to place orders for your products**
 - **Product selection by category or store/warehouse**
 - A grid containing the product details (as per the catalogue above) is displayed
 - The user selects the quantity for each product that they wish to order
 - The grid maintains a running total with each selection
 - When the order is completed, a PDF preform is emailed to the customer and the designated sales person
 - The order can be accepted or rejected by the sales person with notifications sent to the customer
 - A history of orders is maintained that may be used as replenishment orders
- **Sage Pastel interface for the interchange of this data between the WEB and your accounting system**
