

## Asset Tracking Made Easy

FenyaAssetTracking provides a quick and efficient means to track and manage your company's assets with the use of mobile barcode scanners.

Time wasting and unreliable information is no longer an issue as a systematic data exchange ensures data integrity.

Have a real-time view of where each asset is located and its location history with detailed reporting.

### **fenyaAST Provides:**

- A user-friendly interface.
- Country-wide connectivity .
- Barcode scanner integration.
- Asset details include:  
Asset Codes, Descriptions, Make, Model, Warranty, Invoice number of the asset (when it was acquired in case of a return to the supplier), Date Acquired, General Notes.

### **Tracking of Assets using the barcode scanner:**

- Asset details are transmitted to the scanner.
- The user scans all the assets in a location/building.
- Addition of new Assets using the barcode scanner:
  - User selects a building/location.
  - Scan the asset, fill in the required details.
  - Scanner ensures no duplicates are captured.
  - Data is extracted from the scanner and processed into the system.

### **Reporting on Asset movement:**

#### **Auditing Trail**

- Compares the physically scanned data versus the systems' data.
- Discrepancies are highlighted.

#### **Asset Movement**
